PROFILE

I am a web developer with experience in projects focused on responsive design and accessibility. Student in training as a technician in programming applications and cloud services. I have participated in programming bootcamps and have developed both client-side and server-side web applications using Scrum and Git version control methodologies.

PROJECT EXPERIENCE

Escape Room

01/05/2022 - 03/06/2022

Application created for the EducaMás foundation, with the purpose of filtering the students who present themselves, by means of two tests, one of logical tests and the other of code.

https://github.com/Christianlazo11/Frontend_Escape_Room.git
